Driftwood

H3090 ST22 Driftwood

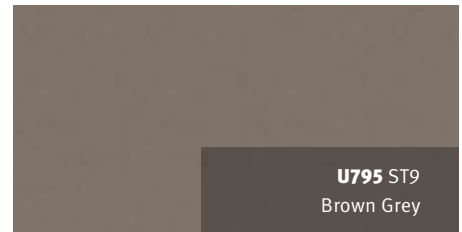

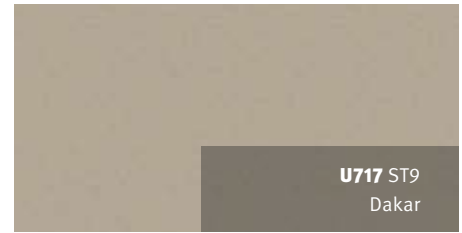

H3090 Driftwood can be perfectly combined with our new brown-grey uni colours. It derives its name from the ‘drifting’ and deviation of the grain, which run into each other in certain parts, creating **the effect of joined veneers** (bookmatched character). “Drift” also refers to the colour tone, which is similar to real drift wood. Due to the grain movement and linear design of this decor it is best used where it can be shown as a wide expanse, such as a metre wide drawer front in a kitchen for example.

The deep ST22 texture accentuates the linear grain pattern to provide a **premium**, almost **3D finish**.

MFC COMBINATION IDEAS

Driftwood can be perfectly combined with all of EGGER's new brown-grey and green-grey uni colours.

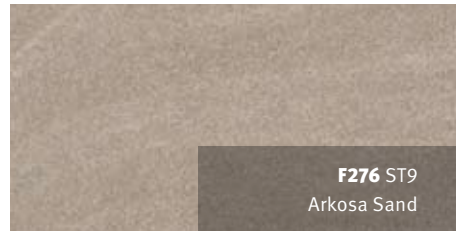

FULL BOARD SCAN

We've scanned a 2700 x 1300 mm board of this decor, so that you can appreciate the grain pattern.

WORKTOP COMBINATION IDEAS

This colourful woodgrain works best in combination with more neutral worktops like sandstone or white.
