

## EURODEKOR® THIN MFC

## INDUSTRY

**DECORATIVE THIN CHIPBOARD  
WITH HARD WEARING SURFACE  
PROPERTIES**

### EURODEKOR® THIN MFC

#### → NEW LOOK EGGER THIN MFC

EURODEKOR® Thin MFC is a new product introduction which is available as a melamine faced board in numerous EGGER decors and surface textures. Thanks to its [scratch resistance](#), [resistance to abrasion](#) and [resistance to chemicals](#), the surface is considerably more robust than the foils previously used.

The core of the product is the EGGER thin chipboard, a light and highly compressed board with a low bark content and especially fine chip structure. Due to its increased raw density, it conforms to the requirements of the RAL quality control association for interior doors and meets the special requirements for [impact resistance](#) and [mechanical resistance](#).

EURODEKOR® Thin MFC is particularly suitable for use in the [door industry](#), but can also be used as an integral component in [sandwich boards](#).

EURODEKOR® Thin MFC

### PRODUCT

- innovative combination of thin chipboard and decor competence
- hard wearing surface properties – high scratch resistance, resistance to abrasion and resistance to chemicals
- high impact resistance and mechanical resistance
- facilitates cost efficient product solutions

## PRODUCT SPECIFICATIONS

Melamine faced thin chipboard, faced on one side, low emission – E1 P2

Delivery programme	
Sizes	5610 × 2070 mm / 2800 × 2070 mm Customized cuts and further sizes on request.
