

Technical leaflet

Egger Eurodekor melamine faced boards

Material description:

Melamine-faced wood based material with a surface texture synchronized with the printing cylinder of Tosinni elm.

Surface texture: ST33 Feelwood Crafted

Description

The Feelwood Crafted surface displays an interplay of matt and light-gloss elements.

The matt and softly brushed pore provides the surface with a beautiful depth effect. It exudes a very natural look - together with its pearlescent component - with the matching decor Tossini Elm. Moreover, the manually planed texture of the surface provides an authentic feel.

The **ST33 Feelwood Crafted** synchronized pore texture is particularly suitable for the following decors:

- H1210 – Tossini elm greige
- H1212 – Tossini elm brown
- H1213 – Tossini elm natur

Special features

The structure ST 33 Feelwood Crafted is synchronized to the printing cylinder of Tossini elm and shows an especially natural look.

Composition

The following compositions have been defined in the production plants to date:

Quality	Deviation from board thickness* [mm]
ML03	+0.6

* Thickness tolerances: see Eurodekor technical datasheet

Gloss level

not defined, because there are very mat but also glossy parts
