

Egger informs:

## Changes to our Flammex product range

We will be offering an **updated range** of Flammex products from **01 December 2021**.

A **newly developed production process** makes it possible **to integrate** the fire-retardant effect of the rawboard **into the coating** of our Eurodekor Flammex and Eurodekor MDF Flammex boards.

### All changes at a glance:

- Production in the UK, made to order.
- Extended range of thicknesses for Eurodekor Flammex P2 12, 16, 18, 19, 22, 25, 28, 30, 38 mm.
- Extended range of thicknesses for Eurodekor MDF Flammex 15, 18, 22, 25 mm.
- The addition of two 0.3 mm flame retardant barrier papers increases the thickness by 0.6 mm.
- For Eurodekor / Eurodekor MDF Flammex, the **rules for processing** Eurodekor multi-layer products apply.
- The **coreboard** is **no longer coloured red**, instead packs will be identifiable by a **vertical green line**. Product labelling is done via the **pack ticket**.
- **ATTENTION:** New European **approval** according to EN 13501-1 for Eurodekor / Eurodekor MDF Flammex for **Euroclass B-s2,d0**.
- Eurospan Flammex and MDF Flammex rawboards will no longer be available.

Fire-retardant laminates and compact laminates are not affected by the change in production and product range.

Further information and technical documents will be available online from 1<sup>st</sup> December 2021 at [www.egger.com/flammex](http://www.egger.com/flammex)
