

MORE FROM WOOD.

**E EGGER**

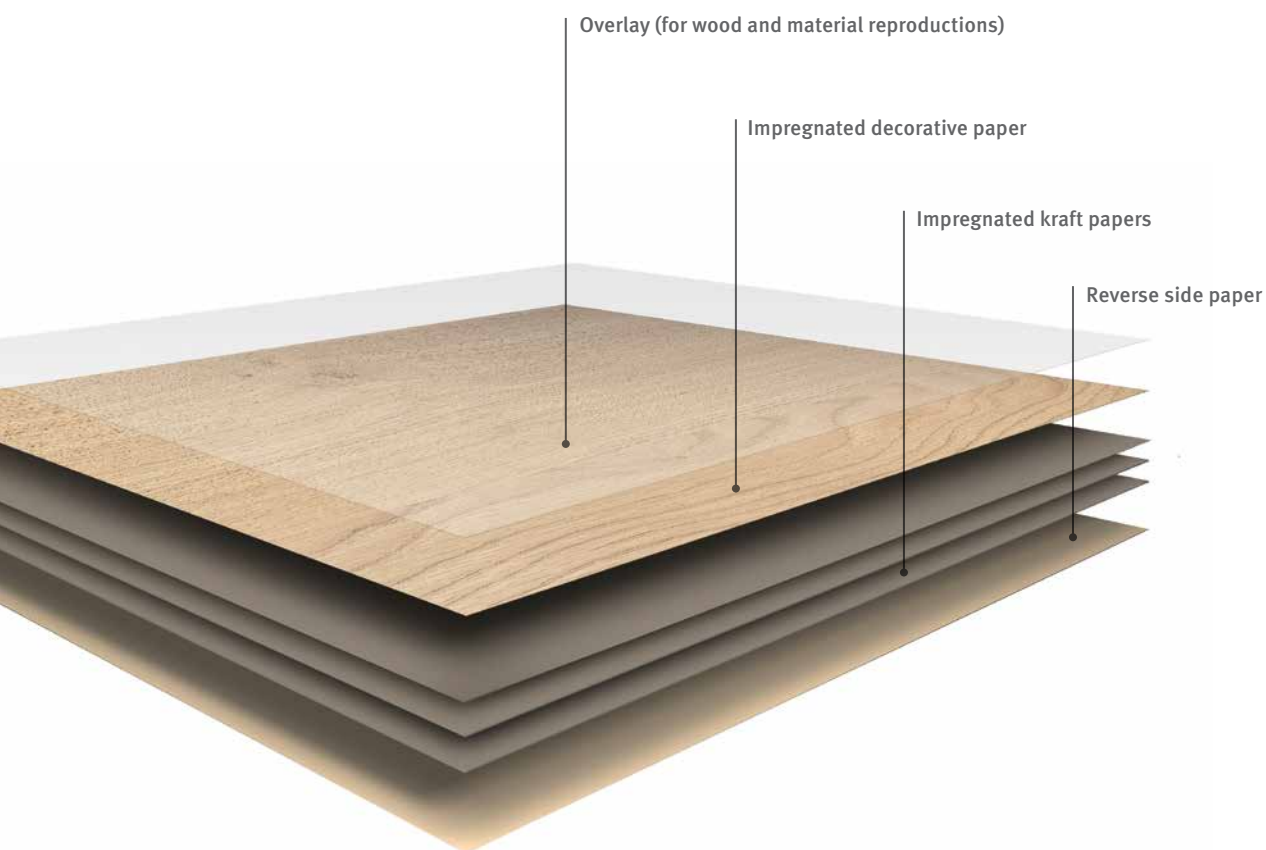

Laminates for ship interior design

Durable surfaces  
with flexibility.

Decorative Collection 24+

# *Design that inspires.* Durability that lasts.

EGGER laminates combine **resistance** and **attractive design**. They are the ideal solution for horizontal and vertical surfaces, as well as for curved or rounded elements, and can be bonded to a wide variety of substrates, such as chipboard, MDF, HDF, multiplex, lightweight boards, aluminium honeycomb and plywood panels.

## MED-certified laminates for ship interior design

For ship interior design, we manufacture laminates in MED (Marine Equipment Directive) quality, which also meet the requirements of the IMO (International Maritime Organization). They are marked with the “steering wheel” symbol on the back. As proof of product quality, planners receive the “EC Certificate of conformity – Module D”, the “EC Type Examination Certificate – Module B” and the “Certificate of fire approval”.

As a fabricator, please request the necessary declaration of conformity alongside your order. This will be provided together with the delivery and invoice.

Laminates score points with their durability, especially for horizontal surfaces subject to increased stress.

## Properties

Thanks to our variety of decors, from white tones and uni colours to authentic wood and material reproductions, you benefit from absolute design freedom in your projects. With EGGER laminate, you work and plan with a resistant, certified and tested material that can be used in a variety of ways.

# The laminate product portfolio

## Laminates (MED)

EGGER laminates are the ideal material for resistant and at the same time attractive design. They can be used for horizontal and vertical surfaces with medium to high stress, as well as for curved or rounded elements.

» Format: 2,800 × 1,310 × 0.8 mm (individual formats on request, minimum quantity 260 m<sup>2</sup>)

» Further information and available decors online: [to.egger.link/laminates](https://to.egger.link/laminates)

### ADVANTAGES

- Postformable (under the influence of heat) and cold-formable, e.g. for curved elements
- Wood reproductions offer a cost-effective and low-maintenance alternative to solid wood and veneer
- Enables curved shapes, even in stone or material looks

## Laminates XL (MED)

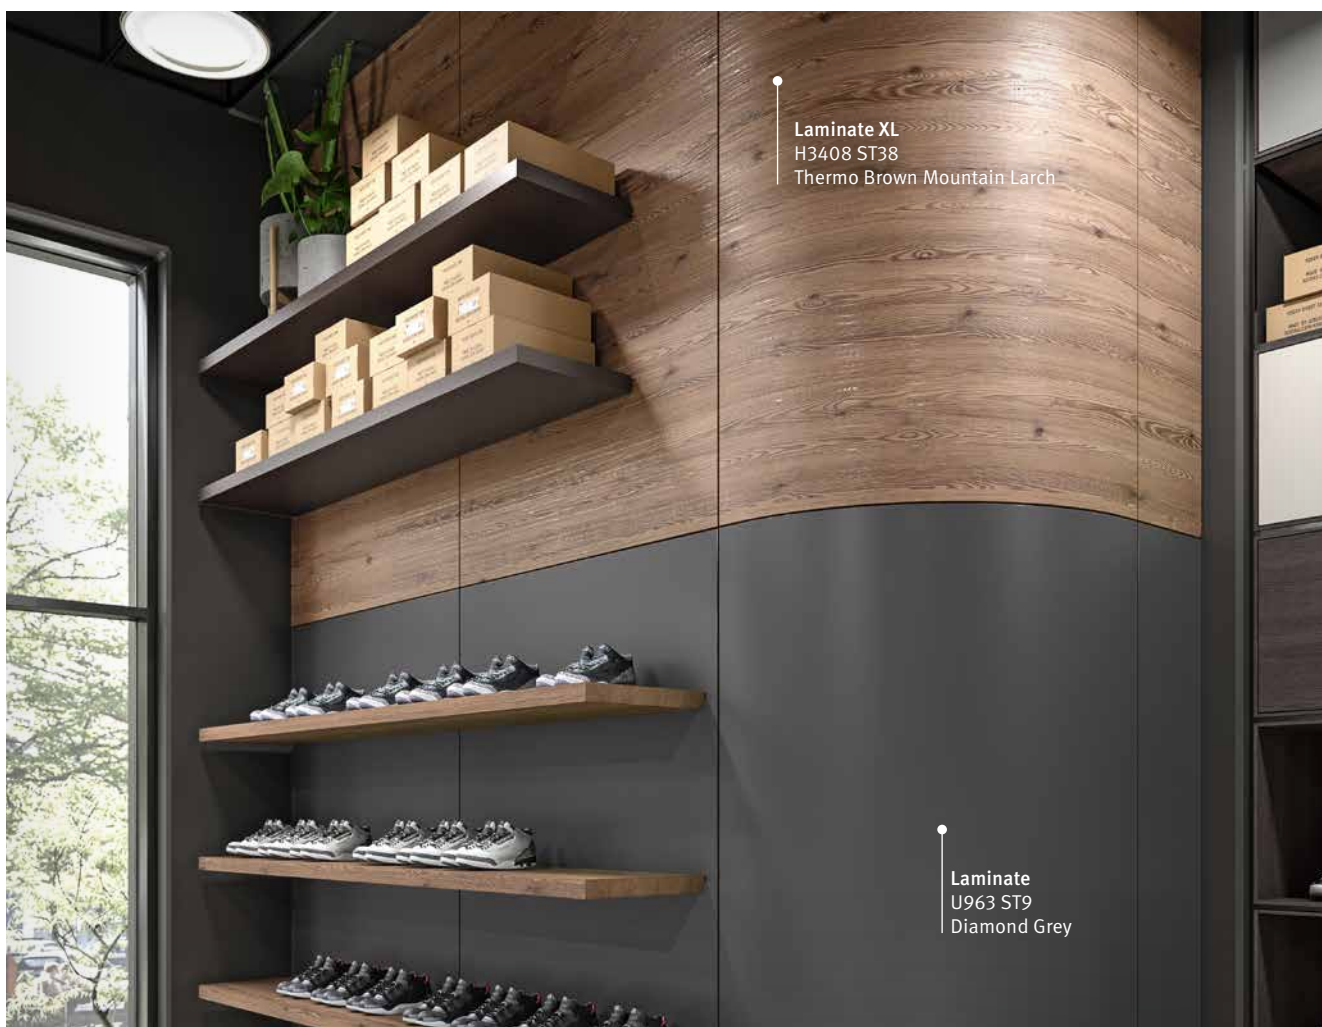

XL laminate decors show their width advantage in large-area applications. They are available in the optimised size 2,790 × 2,060 × 0.8 mm. In the case of wood reproductions, the surface texture is synchronised with the decor image. The resulting look and feel can hardly be distinguished from solid wood or veneer.

» Format: 2,790 × 2,060 × 0.8 mm (individual formats on request, minimum quantity 260 m<sup>2</sup>)

» Further information and available decors online: [to.egger.link/laminates-xl](https://to.egger.link/laminates-xl)

### ADVANTAGES

- Cold-formable
- Extra wide format to optimise size
- Natural look and feel thanks to synchronised pore surface in all wood reproductions
- Also available in selected uni decors

Solid Light Grey

## Laminates in Door Sizes (MED)

Thanks to their resistant surface, the laminates are highly suitable for the decorative design of interior doors. 100 decors are available from stock and in quantities of one in common door sizes. Thanks to the EGGER matching decors and textures, these decors can be ideally combined with faced boards and edging. This creates a perfectly coordinated interior design from the door to the furniture.

- » Formats: 2,150 × 950 × 0.8 mm  
2,150 × 1,020 × 0.8 mm  
2,350 × 1,310 × 0.8 mm (additional for white and uni colours)  
2,800 × 1,310 × 0.8 mm  
(individual formats on request, minimum quantity 260 m<sup>2</sup>)

- » Further information and available decors online: [to.egger.link/doorlaminat](https://to.egger.link/doorlaminat)

### ADVANTAGES

- Optimised door formats from stock and a quantity of one
- Coordinated design from the furniture to the interior door

## Laminates Coloured Core (MED)

Laminates with a coloured core consist of several layers of the uni-coloured decorative impregnate. With mitred furniture, joints and butt edges are almost invisible. In combination with a concealed solid wood edging, the coloured core emphasises the design on the narrow side of the board, e.g. on doors or tables.

- » Format: 2,800 × 1,310 × 0.8 mm (individual formats on request, minimum quantity 260 m<sup>2</sup>)

- » Further information and available decors online: [to.egger.link/coloured-core-laminates](https://to.egger.link/coloured-core-laminates)

### ADVANTAGES

- Continuous, homogeneous look
- Enables almost invisible joints and butt joints
- Underlines the design on the narrow side of a piece of furniture or door leaf in combination with a concealed solid wood edging
