## Everything speaks for Laminate Flooring.

The wood used in the production of our Laminate Flooring is sourced through sustainable forestry, thus reducing our impact on the environment. A valuable contribution and a conscious approach towards protecting the environment.

This is backed up by several national and international environmental certificates. The plank thickness of 7 mm is not only resource-friendly, but can also be installed over existing tiled floors, making it a top product for renovations.

## With Flooring Novelties 2023, EGGER reinvents simplicity.

Restrained, calm decors form the basis for every room and style. Flexible in application and easy to combine, the designs give customers room to reinvent themselves. The sustainable, wood-based Laminate Flooring, the new watertight Aqua CLIC it! technology, and the robust

Design Flooring GreenTec offer flexible products tailored to your customers' needs. Designed to meet the demands of both private and commercial interiors, each have bespoke benefits that contribute towards a safe, long-lasting, comfortable, functional floor.
