ADVANCED
Structural Flooring System

Product Description

EGGER Protect is made from EGGER P5 T&G4 flooring grade chipboard with a durable, low slip, weather resistant surface layer. This surface is bonded to both sides of the board, resulting in a product that offers protection from moisture ingress, not just during construction, but for the life of the floor.

The materials used in EGGER Protect contributes to carbon sequestration, and the circular economy, making it a more environmentally conscious choice for sustainable building practices.

- All sides machine profiled with precise tongue and groove profile
- Can be fitted in light rain conditions, minimising weather-related stoppages and enabling faster completions
- Once fully fitted, can be exposed for up to **100 days** ([BDA Agreement BAF-19-129-S-A-UK](#))
- Low Slip potential in wet conditions according to HSE guidelines
- Fully sealed surfaces protects against water and moisture ingress
- Boards can be easily scraped and washed to give a clean, professional look prior to handover
- When using EGGER Joint & Joist Adhesive no additional tapes or sealants required
- Suitable for NHBC projects
- 100% recyclable
- UKCA & CE certified with timber from sustainably managed forests.
