Product Description

EGGER Protect is made from EGGER P5 flooring grade chipboard with a durable, anti-slip, weather resistant surface layer. This surface is bonded to both sides of the board, resulting in a product that offers protection from moisture ingress, not just during construction, but for the life of the floor.

- Can be fitted in light rain conditions, minimising weather-related stoppages and enabling faster completions
- Once fully fitted, can be exposed for up to 60 days
- Unique anti-slip surface, even in wet conditions, contributes to site safety
- Fully sealed surface protects against water and moisture ingress
- Boards can be easily scraped and washed to give a clean, professional look prior to handover
- Ideal for use with underfloor heating
- The only board we recommend tiling directly onto
- No joint sealing tape required if using EGGER Joint & Joist Adhesive
