Safety Data Sheet

EGGER Eurospan

According to 29 CFR 1910.1200 App D
This product is not hazardous in the form in which it is shipped by the manufacturer, but may become hazardous by wood dust generating downstream activities (e.g. grinding, sanding, cutting or pulverizing).

Section 1: Identification of the substance/mixture and the company/undertaking

1.1 Product Identifier

<table>
<thead>
<tr>
<th>Trade name</th>
<th>EGGER Eurospan</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product description</td>
<td>Chipboard with reduced Formaldehyde content</td>
</tr>
</tbody>
</table>

1.2 Relevant identified uses of the substance or mixture and uses advised against

Recommended use: Decorative use, Furniture, Construction processes

1.3 Details of the supplier of the Safety Data Sheet

Manufacturer/Supplier/Importer: Fritz EGGER GmbH & Co. OG (group)
Regional Support Centre: EGGER Wood Products LLC(US)
P.O. Box 907
Lexington, NC 27293
T+1-800-940-9633

Additional Information: environment@egger.com

1.4 Emergency phone number

1-800-424-9300 / +1 703-527-3887 (Chemtrec)

Section 2: Hazards identification

2.1 Classification of the substance or mixture

OSHA HCS 2012

This product is generally an article and not hazardous, but is regulated under OSHA for the release of wood dust during downstream activities, like grinding, sanding, cutting and sawing. The free formaldehyde levels are below OSHA reporting requirements. The classifications below are based upon wood dust:

- Skin Irritation 2
- Skin Sensitization 1
- Eye Mild Irritation 2B
- Respiratory Sensitization 1
- Specific Target Organ Toxicity Repeated Exposure 2: Respiratory Tract Irritation
- Carcinogenicity 1A
- Combustible Dust
2.2 Label elements
Labelling according to paragraph (f) 1910.1200; OSHA29 CFR

Hazard pictograms

Signal word

DANGER

Hazard statements
May form combustible dust concentrations in air
H315 Causes skin irritation
H317 May cause an allergic skin reaction
H320 Causes eye irritation
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled
H335 May cause respiratory irritation
H350 May cause cancer (inhalation)
H373 Causes damage to organs through prolonged or repeated exposure (inhalation)

Precautionary statements
P202 Do not handle until all safety precautions have been read and understood
P210 Keep away from heat/sparks/open flames/hot surfaces—no smoking
P260 Do not breathe dust
P271 Use only outdoors or in a well-ventilated area
P280 Wear protective gloves and protective clothing/eye protection
P302+P352+P305+P361+P351+P338 On contact: Wash thoroughly with water
P308+P337+P314+P340+P264 If exposed or concerned: Get medical advice/attention if you feel unwell, move to fresh air

2.3 Other hazards
Results of PBT and vPvB assessment
PBT Not applicable
vPvB Not applicable
OSHA HCS 2012 This product is not considered hazardous under the U.S. OSHA 29 CFR 1910.1200 Hazard Communication Standard in the form in which it is shipped, but may become hazardous by wood dust generating downstream activities (e.g., grinding, sanding, cutting or pulverizing).

NFPA Health=1, Flammability=1, Reactivity=0, Special Information=None
HMIS Health=1*, Flammability=1, Reactivity=0, PFE=E
*Chronic Health Hazard
E=Safety glasses, gloves, and a dust respirator

Section 3: Composition/information on ingredients

3.2 Chemical characterization: Mixtures (article)
Description The products are composed of wood and cured amino resins (polymer). See Section 8 for exposure limits discussion.

*Wood contains trace amounts of various chemicals present in the environment, which are absorbed by trees through natural growth. A comprehensive listing of species is available upon request. The product can contain trace amounts of various
chemicals by the use of post-consumer-recycled material.

All products produced at EGGER are certified according to the strict California Air Resources Board (CARB)/ TSCA Title VI.

CALIFORNIA RESIDENTS: This product contains one or more chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

Section 4: First aid measures

4.1 Description of first aid measures

General information

No special measures required regarding the product in the form it is shipped, downstream activities like cutting, sawing or grinding can generate dust. To avoid health hazards while these downstream activities, take note of the following measures:

Inhalation

If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.

Skin

Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. After contact with the molten product, cool rapidly with cold water.

Eye

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion

Rinse mouth thoroughly with water. Get medical attention if you feel unwell and contact a poison control center or medical professional.

4.2 Most important symptoms and effects, both acute and delayed

Refer to Section 11 – Toxicological Information

4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available

Section 5: Firefighting measures

5.1 Extinguishing media

Use firefighting measures that suit the environment

Water

Fire-extinguishing powder

Carbon dioxide

Foam

5.2 Special hazards arising from the substance or mixture

Particleboards are Class A combustible material. If involved in a fire, product will burn.

Particleboards are not an explosion hazard. Sawing, sanding, or machining particleboards can result in the by-product wood dust. Wood dust may present a strong to severe explosion hazard if a dust cloud contacts an ignition source.

Airborne concentrations of 15 grams per cubic meter are often used as the lower explosive limit (LEL) for wood dusts. OSHA interprets the explosive level as having no visibility within five feet or less.

In case of fire, the following gases can be released:

Carbon dioxide (CO₂), Carbon monoxide (CO), Oxides of Nitrogen and other hazardous gases and particles
5.3 Advice for firefighters
Protective equipment
- Mouth respiratory protective device
Additional information
- Prevent formation of dust
Dispose of fire debris and contaminated firefighting water in accordance with official regulations.

Section 6: Accidental release measures
6.1 Personal precautions, protective equipment and emergency procedures
Personal Precautions
- Do not breathe dust.
Emergency Procedures
- No emergency procedures are expected to be necessary if material is used under ordinary conditions as recommended.

6.2 Environment precautions
No special measures required

6.3 Methods and material for containment and cleaning up
Not applicable for product in purchased form. Dust generated from sawing, sanding, drilling or routing this product may be vacuumed or shoveled for recovery or disposal. Wood dust clean-up and disposal activities should be accomplished in a manner to minimize of airborne dust.
Dispose of the material collected according to regulations

6.4 Reference to other sections
See Section 7 for information on safe handling
See Section 8 for information on personal protection equipment
See Section 13 for disposal information

Section 7: Handling and storage
7.1 Precautions for safe handling
Use good safety and industrial hygiene practices. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Wear a respiratory mask if using hand tools without a dust extraction device. Observe all liability insurance association regulations for commercial processing operations (e.g. safety goggles).
Information on protection against explosions and fires
- Avoid formation of dust

7.2 Conditions for safe storage, including any incompatibilities
Storage
- No special precautions for handling product. Use good safety and industrial hygiene practices. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.
- Keep away from ignition sources

7.3 Specific end use(s)
No further relevant information available

Section 8: Exposure controls/personal protection
8.1 Control parameters
Wood dust needs to be controlled while cutting, sawing, drilling or other dust generating processes are performed.
8.2 Exposure controls

</tbody>
</table>

Engineering measures/controls

Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable threshold limit values. Due to the explosive potential of wood dust when suspended in air, precautions should be taken during sanding, sawing or machining of wood products to prevent sparks or other ignition sources in ventilation equipment. Use of totally enclosed motors is recommended.

Personal Protective Equipment Pictograms

Respiratory

Use of a NIOSH/MSHA approved dust respirator is recommended where airborne dust levels exceed appropriate PELs and TLVs.

Eye/face

Wear safety glasses

Hands

Wear protective gloves – Rubberized cloth, canvas or leather gloves

Skin/Body

Wear long sleeves and/or protective coveralls.

General Industrial Hygiene Considerations

Practice good housekeeping and avoid creating/breathing dust. Do not allow dust to collect. Maintain, clean, and fit test respirators in accordance with OSHA regulations. No data available

9.2 Other information
No further relevant information available.

Section 10: Stability and reactivity

10.1 Reactivity
The product is not reactive under normal conditions of use, storage and transport.

10.2 Chemical stability
Stable under recommended storage conditions.
Conditions to be avoided: No decomposition if used according to specifications.

10.3 Possibility of hazardous reactions
No dangerous reactions known.

10.4 Conditions to avoid
Exposure to water, ignition source, high relative humidity and high temperature.

10.5 Incompatible materials
Incompatible Materials: acids(strong), Oxidizers(strong)

10.6 Hazardous decomposition products
Hazardous decomposition may occur thermal and/or thermal oxidative decomposition can produce irritating and toxic fumes and gases.

Potential Health Effects
No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs include:

Inhalation
Acute (Immediate) May cause respiratory irritation
Chronic (Delayed) Repeated and prolonged exposure may cause cancer. Repeated and prolonged exposure may cause sensitization of the respiratory system.

Skin
Acute (Immediate) May cause irritation
Chronic (Delayed) Repeated and prolonged exposure may cause sensitization

Eye
Acute (Immediate) May cause irritation
Chronic (Delayed) No data available

Ingestion
Acute (Immediate) Under normal conditions of use, no health effects are expected.
Chronic (Delayed) Under normal conditions of use, no health effects are expected.
Carcinogenic Effects
Wood dust as Wood dust, all soft and hard woods Under normal conditions of use, no health effects are expected.
Formaldehyde Wood dust is listed by NTP known to be a Human Carcinogen (10th Report, IARC Monographs: Wood dust, group 1 – IARC Group 1: Carcinogenic to humans; sufficient evidence of carcinogenicity. This classification is primarily based on studies showing an association between occupational exposure to wood dust and adenocarcinoma of the nasal cavities and paranasal sinuses. IARC did not find sufficient evidence of an association between occupational exposure to wood dust and cancers of the hypopharynx, oropharynx, lymphatic and hematopoietic systems, lungs, stomach, colon or rectum.
