EGGER Joint & Joist Adhesive New Twist Action Bottle Cap

Used as part of the EGGER Advanced Structural Flooring system. EGGER Joint & Joist Adhesive is a unique expanding adhesive that is designed for external environments and to foam out of the board joints protecting against moisture ingress.

- Unblockable cap with easy twist action allows bottle to be resealed
- Keeps waste to a minimum and adhesive can be preserved between projects
- No need for a knife to be used to cut bottle top. Resulting in less risk of accidents, no missing lids and less litter on site
- Cap is designed to achieve an optimal 5mm bead, minimising excessive gluing
- Cap size allows adhesive to be applied directly into the groove and shoulder of EGGER Tongue and Groove boards
