Egger Decorative Collection 2020 – 22

**Collection
extended until
end 2023**

We are extending the **EGGER Decorative Collection through to the end of 2023**, and giving you even more **planning security** and **design freedom** to realise your ideas thanks to **additional product variants and optimised availability**.

Upgrade: PerfectSense® Premium Matt and Premium Gloss Lacquered Boards

We have **improved the quality** of our PerfectSense Lacquered Boards. This means that you can now use the matt and high-gloss surfaces for **horizontal applications**. Combined with the well-known anti-fingerprint and antibacterial surface properties, the PerfectSense Lacquered Boards now offer a wide range of benefits for your customers.

Additional benefits:

- Easier to process
- Enhanced microscratch & scratch resistance
- Food-safety
- Premium Matt (PM) suitable for horizontal applications
- Premium Gloss (PG) suitable for horizontal applications on low use surfaces

New product: Laminate PerfectSense® Topmatt with coloured core

This new product combines the advantages of a **super-matt**, anti-fingerprint, velvety-warm lacquer surface with those of a **coloured core laminate**. Joint lines and visible edges are minimised, for maximum effect. The lacquered surface, hardened with electron beams, is resistant to wear, impact and scratches.

Available Decors:

- W1101 PT Solid Alpine White
- U9991 PT Solid Black

Eurodekor Flammex
H1334 ST9
Light Sorano Oak

New working principle: Eurodekor® Flammex

New product development means the flame retardant is now integrated into the coating. An intumescent agent within the barrier paper triggers a multistage chemical reaction. This forms a carbon foam layer which has an isolating effect on the wood-based board. You benefit from a wider variety of core boards, and therefore more options for projects.

New product features:

- Thickness increase of 0.6 mm due to multilayer construction on both sides
- Flame retardant property regardless of core board
- Chipboard no longer coloured red
- Classification as B-s2,d0 acc. to EN 13501-1

» Watch the [video](#) to see how it works

New decor offer: Compact worktops

The 12 mm thin and robust compact worktop comes with a bevel milling on the top and bottom of the longitudinal sides. This highlights its modern look as do the perfectly matched core colours.

There are two new additions to the compact worktops range:

- F186 ST9 Light Grey Chicago Concrete
- F206 ST9 Black Pietra Grigia
