Everything speaks for Laminate Flooring.

Efficient resource production and reducing our environmental impact: The wood for our Laminate Flooring is sourced from sustainable forests. A valuable contribution to a conscious approach to nature and to a healthy indoor climate. This is also guaranteed by several national and international environmental certificates. The plank thickness of 7 mm is not only resource-friendly, but can also be installed well over existing tiled floors, making it a top product for renovations.

Naturally a good choice: EGGER Design Flooring GreenTec.

Stylish in design and highly resistant. Thanks to its special product structure, a water-resistant surface, the GreenTec coreboard and installation system CLIC it!, EGGER Design Flooring GreenTec is water-resistant for 72 hours. In contrast to conventional vinyl floors, our wood-based Design Flooring GreenTec is free of PVC and the integrated sound barrier mat is made of cork and guarantees an easy installation.
