

MORE FROM WOOD.

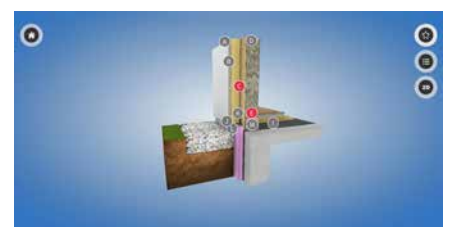

E EGGER

**Timber construction goes into a lot of detail.
Just like this free App.**

Wall, ceiling, and roof structures made with EGGER building products can be viewed in 3D detail in the Construction Catalogue App. Complex construction details are visualised from all sides for a complete perspective of individual structures in your project.

- » Current material information and references to standards
- » Classification in dry screed systems, classified fire protection constructions, and construction details
- » Additional information regarding fire, sound and heat insulation, as well as timber frame construction and the planning of structural engineering
- » Additional 2D drawings included with the construction details
- » Request free classification reports
- » Product links for additional information available on the EGGER website
- » All structures and details can be quickly found in the table of contents thanks to the same numbering system as in the print version
- » Favourites feature for frequently used constructions
- » Direct camera access and straightforward upload function for images and videos in the customisable case study area
