# EGGER PerfectSense – For a high quality look and feel

## PerfectSense Matt (PM)

This surface reveals a very low sheen, matt, finish with anti-fingerprint functionality in line with the very latest minimalist trends.

## PerfectSense Gloss (PG)

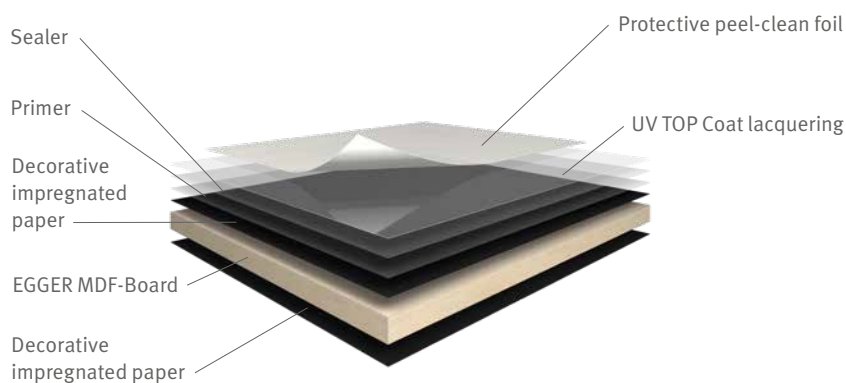

This surface is characterised by an ultra-glossy finish, distinguishing it from other classic glossy surfaces.

PerfectSense is a premium category of high-gloss and matt lacquered MDF boards. It creates an air of exclusivity and luxury in residential and commercial spaces. An expanded decor range in matching materials give you more design freedom for your high-end projects.

The smooth surface of the MDF core provides a very flat and flawless surface. These melamine faced MDF core boards are manufactured using a sophisticated lacquering process. This specially developed lamination procedure with UV lacquer technology, helps to provide a premium Gloss or Matt product.

The surfaces of PerfectSense lacquered boards are microscratch resistant, so they are well suited to high levels of mechanical stress, such as daily cleaning. To ensure hassle-free processing, a protective film is applied to the PerfectSense surfaces.

### PerfectSense Lacquered Boards

# Comprehensive solutions in matching products

## Laminates

In addition to the PerfectSense Matt lacquered boards, postformable PerfectSense Matt laminates are available in the same decor. The PerfectSense Gloss lacquered boards are also available as laminates, with the HG (Highgloss) surface texture, although this is not postformable. Due to the different surface production processes, the gloss level may slightly differ between lacquered boards and laminates.

All laminates are available in the format 2800 × 1310 × 0.8 mm from a quantity of one and are delivered with a protective foil.

## Edging

To achieve a perfect finish, all melamine faced chipboard decors are also available as edging in the same decor and texture.

All PerfectSense Matt and Gloss decors are available as ABS edging in 23 × 1.0 mm (75 m) as well as PMMA edging in 23 × 1.3 mm (75 m). PMMA Edges, which match the EGGER PerfectSense decors, have a unique finish with an intensive colour and allow you to produce high-quality furniture finishes.

→ The Doppia Black-Gold F8982 furniture edge, awarded a “Special Mention” at the **German Design Award 2017**, is used in upscale interior design, on furniture fronts, table tops, kitchen and bathroom furniture. Visual perfection is achieved thanks to its narrow joint. The edge is made of a high-quality, stable, and thermoplastic material (PMMA) and is by far the best material for creating striking effects. Its two-tone look creates an optimal colour transition to the surface of a black PerfectSense Matt lacquered board.

## Excellent furniture accent

With the Doppia PMMA Collection which includes five designs we react to the trend towards accents and contrasts in furniture design.

H8959 AC  
Doppia Black-Nature  
PMMA

H8960 AC  
Doppia White-Nature  
PMMA

H8961 AC  
Doppia OnyxGrey-Nature  
PMMA

F8981 AC  
Doppia Black-Copper  
PMMA

F8982 AC  
Doppia Black-Gold  
PMMA

Visually attractive with a sleek touch, the product is well suited for applications in residential and commercial areas, whether this is upscale retail or furniture design.
