EGGER Laminate Flooring, Comfort Flooring and Design Flooring

Waste disposal

EGGER Laminate Flooring, Comfort Flooring and Design Flooring remains from construction site as well as those from demolition activities, should be carried, first and foremost, to a recycling centre. If this is not possible, no longer usable laminate flooring remains, Comfort Flooring and Design Flooring remains must be used for the production of process energy and electricity (cogeneration) instead of being stored because of the high heating value of approx. 16MJ/kg (waste disposal key according to European waste catalogue: 170201/030103).

If a consumer takes the flooring to a municipal disposal or mixed bulky waste centre, this is categorized according to key numbers 200138 (sorted disposal) or 200307 (bulky waste) for municipal waste. According to this waste disposal key a thermal recycling (recycling center or direct thermal power station) would also be possible. A landfill with for example construction waste is anywhere Europe not allowed.

Waste disposal key

- according to European waste catalogue: 170201/030103
- according to municipal right 200138

Provisional note:

This technical data sheet has been carefully drawn up to the best of our knowledge. It is intended for information only and does not constitute a guarantee in terms of product properties or its suitability for specific applications. It is based on practical experiences, our own tests and corresponds to our present state of knowledge. We accept no liability for any mistakes, errors in standards, or printing errors. In addition, technical modifications may result from the continuous development of EGGER flooring, as well as from changes to standards and public law documents. Therefore, the content of these processing instructions cannot serve as instructions for use nor as a legally binding basis.
