Technical leaflet

Egger Eurodekor melamine faced boards

Material description:

Melamine faced wood-based materials with a surface texture synchronized with the printing cylinder of Pinegrain.

Surface texture: ST38 Feelwood Pinegrain

Description

The Feelwood Pinegrain surface displays a deeply brushed softwood appearance. Thanks to the interplay between matt-gloss elements, this surface obtains its own special note: Applied to the matching Mountain Larch decor, it creates the effect of a pearlescent decor. The surface has a special impact on uni colours, in particular black.

The ST38 Feelwood Pinegrain synchronised pore texture is particularly well suited for the following decors:

W1000 – Premium white

H3404 – Pinegrain brown

U999 – black

H3406 – Pinegrain anthrazit

H3403 – Pinegrain white

Special features

ST38 Feelwood Pinegrain is synchronised with the printing cylinder of Berglärche and leads to a pearlescent effect. The surface gets an exceptional effect with uni-colors, especially black.

Composition

Quality	Deviation from board thickness* [mm]
ML03	+0.6

* Thickness tolerances: see Eurodekor technical datasheet

Gloss level

Gloss points (60°): cannot be determined precisely due to the pronounced matt-gloss effect

Decor collection

Egger Decorative Collection (EDC)

Sampling

On request
