high activity interiors.**

# EGGER Compact Laminate

elegant, hygienic, robust.

## Overlay:

Compact laminates with print decor (wood and material reproductions) include the overlay.

EGGER Compact Laminate is an attractive, **durable and moisture resistant**, board providing new design opportunities for furniture and interior design. Compact laminate is well suited for interior applications subjected to **high stress**, and areas that require high levels of **hygiene and cleanliness**, such as in kitchens, restaurants, hospitals, or clean rooms.

It can also be used in wet areas, such as bathrooms, changing rooms and sanitary rooms. **The combination of durability and an elegant look and feel** that makes the compact laminate an option for a number of applications also within the commercial project field.

## General

EGGER Compact Laminate is compact laminate press material according to EN 438 with black, white, or flame-retardant core. They are made of multiple layers and consist of melamine resin impregnated decorative paper as cover layer and a fibrous core layer bound with thermosetting resins.

Individual components are pressed together under high pressure and temperature according to the specifications of an HPL laminate press. **Sizes: 2,790 mm × 2,060 mm or 5,600 mm × 2,060 mm.**

H3325 ST28 Tobacco Gladstone Oak

## Benefits at a glance

- Visually appealing and elegant
- Resistant and impact-resistant
- Durable material
- No edge or surface finish required
- Standardised material for precise machining
- High stability
- Moisture resistant
- Hygienic and easy to maintain
- Resistant to everyday cleaning products and chemicals

## Compact laminate with synchronised pore

Feelwood synchronised pore textures underline the orientation of the grain in the decor. In this way, the look and feel qualities of natural wood are reproduced in a very natural manner.

By using Feelwood decors on compact laminate you get the **advantages of both products with an authentic finish** and long lasting wear resistance.

(Decors in the synchronised pore structures ST28 and ST37 are only available on compact laminate with black core in 8 and 13 mm material thickness.)
